Professional Summary

Enthusiastic and detail-oriented Computer Science undergraduate with a strong aptitude for problem-solving and a passion for creating accurate, structured, and reliable technical solutions. Hands-on experience through software development projects and internships has strengthened my ability to understand requirements, analyze problems, debug solutions, and continuously improve outcomes. A quick learner with strong attention to detail, clear communication, and a systematic approach to complex challenges, seeking to contribute to coding assessment and outcome-based learning initiatives in a collaborative environment.

Technical Skills

Programming: C++, C

Web: HTML5, CSS3, JavaScript

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, SQL

Tools: VS Code, Git, GitHub, Render

Problem Solving: Debugging, Test Case Design, Complexity Analysis, Analytical & Logical Reasoning

AI Tools & Productivity: Generative AI (Prompt Engineering), ChatGPT, Meta AI, Gemini, 10Web, AI-Assisted Content Creation, Content Validation, Technical Research

Documentation: MS Office, Google Sheets, Data Management, Cross-Functional Collaboration

Projects

- **Smart Attendance Management System** — Designed and implemented an automated attendance management system using facial recognition to identify individuals and record attendance in real time, improving attendance tracking efficiency and accuracy.
- **Image Recognition Chatbot** — Built an image-analysis chatbot that processes images and provides descriptive information about detected visual content, demonstrating image understanding and AI-assisted interaction.
- **Expense Tracker Application** — Developed a user-friendly expense tracking application for managing income and expenses, organizing financial records, visualizing spending patterns and supporting better financial planning.
- **Sneakers Website** — Developed a responsive e-commerce website for showcasing sneakers with a mobile-friendly interface using HTML, CSS and JavaScript, focusing on usability, product presentation and user experience.

Internship Experience

Software Developer — Renao Robotics Pvt. Ltd. | Jul 2025

- Worked on software development and problem-solving tasks
- analyzed technical requirements and developed structured solutions.
- Strengthened , debugging, analytical reasoning and technical communication skills.

Software Developer — CYNBIT Technologies | Jul 2024

- Applied debugging and structured programming concepts during software development tasks. Used systematic problem-solving approaches to understand issues and improve solutions.

Education

B.Tech, Computer Science & Engineering — Poornima College of Engineering, Jaipur | 2023–Present |

CGPA: 7.00

Class 12th (Science) — 68% (2022) | **Class 10th** — 72%

Certifications

- Data Structures & Algorithms — NPTEL
- GfG 160 — 160 Days of Problem Solving — GeeksforGeeks
- Analysis of Algorithms — NPTEL
- Cloud Computing — NPTEL
- Introduction to Operating Systems — NPTEL

Achievements & Skills

- Solved 300+ DSA problems on coding platforms and completed the GfG 160 Days Challenge.

Soft Skills: Communication, Teamwork, Problem Solving, Analytical Thinking, Attention to Detail
